I am electronic technician for ten years ago if you see my curriculum vitae You can check the international enterprise when I worked, for example: Tryo Aerospace, Hp Inc and JZ Recielca.

As a recent cross-platform developer bachelor technician graduate from Barcelona, I am currently looking for a programmer job.

I am sure my skills will help you in your Software Enterprise.

I am studying English but, I don't have any problem for interview in English.

During my time in Tryo Aerospace as electronic production technician, I built a lot of satellites for ESA(Agency spacial of Europe).

In Hp Inc I was electronic engineering suport, I Additionally, I know how to use Cadence and Circuit Cad, which are other skills that were also mentioned in my curriculum vitae.

In JZ Recielca I was electronic repair technician, I Additionally, I know back engineering.

I have knowledge in this programming languages; Java, PHP, MySql, JavaScript, Bash, Flask, C, C++, Arduino.

I am currently learning programming languages like a Rust, Python, Solidity, Python. Also I am learning frameworks like a JQuery, ReactJs, React Native.

I you want to check my knowledge in this programming languages and frameworks you can check my projects in my github repository: <https://github.com/6aligula>

Sincerely,

Vinicio Alejandro Naranjo Mosquera
