I have been working as electronic technician from ten years ago. If you see my curriculum vitae You can check the international enterprise when I have worked in, for example: Tryo Aerospace and Hp Inc.

As a recent cross-platform developer bachelor technician graduate from Barcelona, I am currently looking for a computer programmer job position.
I am sure my skills will help you in your Software Enterprise.

I am studying English but, I don't have any problem for interview in English.

During my time in Tryo Aerospace as electronic production technician, I built some parts of satellites for ESA(Agency spacial of Europe).

In Hp Inc I performed electronic engineering suport tasks. Additionally, I am used to work Cadence and Circuit Cad, which are other skills that were also mentioned in my curriculum vitae.

In JZ Recielca I worked as electronic repair technician. Additionally, I have a reverse engineering background.

I have also a knowledge in the following programming languages; Java, PHP, MySql, JavaScript, Bash, Flask, C, C++, Arduino.

I am currently learning programming languages like a Rust, Python, Solidity and also frameworks like a JQuery, ReactJs, React Native.

I you want to check my knowledge in this programming languages and frameworks you can check my projects in my github repository: <https://github.com/6aligula>

Sincerely,

Vinicio Alejandro Naranjo Mosquera
