I am writing to express my interest in the programmer position. I am an electronics and software engineer with over 10 years of experience in high-level industrial environments, and I recently graduated as a cross-platform application developer in Barcelona. I am eager to bring my technical skills and software experience to contribute to your team's success.

Throughout my career, I have had the privilege of working for renowned international companies such as Tryo Aerospace and HP Inc. At Tryo Aerospace, I played a key role in constructing components for satellites in collaboration with the European Space Agency. At HP Inc., I supported electronic engineering tasks and gained hands-on experience with tools like Cadence and Circuit Cad.

In addition to my engineering background, I am proficient in programming languages such as Java, PHP, JavaScript, C, and C++. Recently, I have expanded my skills to include Python, Rust, and Solidity. I am also experienced with frameworks and tools like Flask, React, and Arduino, which enable me to adapt to various technologies and working environments.

My profile is further complemented by my experience in IoT and automation projects, as well as front-end and back-end application development. I have worked on projects including an e-commerce platform and an app for locating lost pets. You can find examples of my projects on GitHub at https://github.com/6aligula.

I am currently improving my English skills and am fully prepared to participate in an interview in English. I am confident that my skills and experience will be a valuable asset to your software development team.

Thank you for your consideration, and I look forward to the opportunity to discuss how I can contribute to your company.

Sincerely,

Vinicio Alejandro Naranjo Mosquera
